

## Lantal presents its highlights in Hamburg

**Langenthal, Switzerland – From April 2 to 4 at Aircraft Interiors Expo 2019, Lantal is again demonstrating why it ranks among the aircraft industry’s leading providers of textiles. At Stand 6E70 in Hall B6, visitors can immerse themselves in a realm full of fresh ideas for aircraft interiors. Highlights include the new Conceptual Forecast collection and the lightest carpets that Lantal has developed and qualified so far.**

Airframe makers and airlines around the globe need competent support when they implement their complex projects. So for over 60 years, they have been relying on the quality of fabrics, carpets, leathers, ready-to-install products, laboratory services, design counsel and the Pneumatic Comfort System (PCS) that they source from Lantal. The Swiss company’s all-in-one solutions fulfill the needs of the aviation industry and assure the utmost in passenger travel comfort.

### Conceptual Forecast collection 2019 – Lantal’s trend worlds

Lantal’s design team continually monitors and analyzes megatrends as a service to the aircraft industry. The results are summarized in a trendletter that constitutes the foundation for the Conceptual Forecast. The collection is a treasure chest of forward-looking, tastefully combinable

seat cover fabrics, carpets, curtains, and leathers. It proves that Lantal can transform inspirations and trends into textiles. Moreover, the CF collection supports design firms and airlines in their pursuit of ideas and in the execution of their interior projects. Beyond that, Lantal products also address the constantly growing set of requirements that the aircraft industry faces. One example is our TEC-Leather, which is characterized by excellent stain resistance and unmatched cleanability. Our experienced design team will show visitors how these products can be coordinated and ideas evolved to create exceptional cabin environments that perceptibly express the DNA of the airline.

### **Lantal's lightest carpets yet**

With the objective of optimized performance and cost-effectiveness, we have developed our so far lightest wool-blend and polyamide carpets with a weight of under 1100 g/m<sup>2</sup>. Less weight means lower jet fuel consumption as well as a reduction of CO<sub>2</sub> emissions. These carpets fulfill the most ambitious design and product standards of the airline industry and are Airbus-qualified.

### **Lantal – The company**

*Lantal is a leader in the design, production, and distribution of textiles, parts, and services for the international aircraft, bus, and railway markets as well as for business jets and superyachts. The company offers forward-looking counsel and coherent all-in-one solutions with the objective of achieving the ultimate in passenger well-being.*

### **Lantal – Subsidiary at Aircraft Interiors Expo 2019**

*Airline Services Interiors is a Lantal subsidiary that will also have a presence at AIX 2019 in Hamburg with its own stand (**Hall B6, Stand 6B58**). ASI develops and delivers cost-effective, high-quality customer-specific solutions for the refurbishment, modernization, and upgrade of cabin interiors.*
